

2021 HOROSCOPES FOR PARENTS

ARIES

March 21 - April 19

Aries is always up for an adventure and this year's adventures in sleep regressions will prove one for the ages. Watch out for your quick temper in late April when Venus squares off with Saturn and Pluto. There will be screaming, crying, and a little vomit...some of it may actually be from your child. Try not to throw anything at your partner.
