

2021 HOROSCOPES FOR PARENTS

LEO

July 23 - August 22

For Leo, May through July sees Jupiter transit through your eighth house – the house that rules transformation. It's a great time to take control over relationships, especially the one with your mother-in-law. Your faithful and loving nature may have prevented you from telling her that you don't care that she thinks your children look feral but use this an opportunity to put her in her place...and then use rest of the year to have major anxiety over what you said.
