

2021 HOROSCOPES FOR PARENTS

TAURUS

April 20 - May 20

Always patient Taurus will be fine baking quarantine cookies for the millionth time with the kids now that you can readily get flour. However, be mindful of your resentful side which will come out while Mars is in Libra. Your social media feed will be filled with flawless projects done by smiling families and your desire for perfection will make you want to hurl your Pinterest fail out the window. Stay calm, Taurus. Their house is a mess too.
